WELCOME!

Welcome to the Graduate School of the University of Connecticut, and to the Graduate Programs in Human Development and Family Studies (HDFS). This Handbook is designed to provide you with basic information concerning what we have to offer, what you should expect of us, and what we expect of you. *It is in your interest to read it carefully and to consult with your Major Advisor or the Associate Department Head for Graduate Studies about any unclear points.* Students in the Marriage and Family Therapy (MFT) clinical program may also wish to direct questions to the Director of the clinical training program. We hope you will feel free to ask questions as they arise, so that you can avoid unnecessary complications.

This Handbook is not meant to displace or in any way void the Graduate School catalog. All University of Connecticut graduate students are held to the basic requirements and regulations of the Graduate School as designated in the catalog. Various programs adopt requirements that apply in addition to the overall Graduate School requirements, and this Handbook includes certain requirements that we have added.

In entering this program, you are joining a field that is being created at the present time. The career you make for yourself at the University of Connecticut and beyond will depend largely upon your own resourcefulness and initiative as you choose from the range of available options. Course requirements are oriented toward presenting you immediately with a content overview, a range of alternative academic and professional directions from which you can choose, and basic research skills. After that, the range of options available to you will depend largely on your choice of directions. Our programs are small enough to be tailored to your personal needs and goals, yet large enough to provide considerable diversity and exposure to a variety of perspectives.

We look forward with excitement to our mutual association, and hope that both you and we may find it a challenging and rewarding experience.

Sincerely yours,

Ronald M. Sabatelli, Ph.D., Department Head, HDFS

JoAnn L. Robinson, Ph.D., Associate Department Head for Graduate Studies, HDFS

SIGNIFICANT DATES 2010-2011

Calendar – Fall Semester 2010

I. THE GRADUATE PROGRAMS

Cohesiveness and Purpose

The key word for the graduate programs in Human Development and Family Studies is context. All of the HDFS programs are concerned with human behavior and family patterns and processes as these are influenced by physical, social, cultural and historical factors. The foci of the program extends to how these different ecological or environmental factors influence the varied trajectories of individual and family development over time. This appreciation of real world contexts leads many HDFS professionals to view human development and family life through action- and change-oriented lenses.

Consequently, the graduate program within HDFS is designed to prepare professionals to become involved in investigations of individuals and families in various stages of development in ways that lead to change. Some students, through our clinical Marriage & Family Therapy (MFT) program, will learn to effect change through the process of treatment. Others will learn to effect change through prevention, public policy, program evaluation or through research focused on developmental and family processes within physical, social, and cultural contexts.

Our graduate programs of study have been designed to encourage and support students' personal and professional growth and development. Our programs are predicated on the belief that intellectual curiosity is an intrinsic part of being a successful and contributing professional and that students must feel free to pursue their curiosities while engaged in our programs of study.

A. THE MASTER OF ARTS PROGRAMS

M.A. Academic Requirements

All M.A. candidates are required to:

1. Design and successfully complete a Plan of Study (POS) that is consistent with the Graduate School requirements for the thesis or non-thesis track. The POS is developed in consultation with the student's Major Advisor and advisory committee and is designed to meet the student's interests and goals as well as the Graduate School's requirements for the M.A. degree. Thus, the exact number of courses in a POS depends on each student's preparation and specific area of study.
2. Include the following courses on their POS - HDFS 5001: Proseminar in Human Development and Family Studies, HDFS 5003: Research Methods in Human Development and Family Studies I, and HDFS 5215: Models and Concepts of Lifespan Human Development. These courses should be taken as early as possible in their academic program.
3. Maintain a "B" average (3.0 GPA) throughout their course of study.
4. Pass a "final" oral examination.
5. Complete any additional requirements deemed essential by their advisory committee.

Please Note: *HDFS Students in the M.A. program in MFT have additional required and recommended courses, clinical practica, and professional experience requirements. MFT students are referred to the Marriage and Family Therapy Program Handbook for specific information pertaining to their licensure requirements.*

Important Information Concerning the M.A. Degree

Thesis

As noted above, all M.A. students are required to write a thesis or thesis equivalent. If a student wishes to register a Master's Thesis with the Graduate School and have a Master's Thesis recorded on their official University of Connecticut transcript, the student must register for nine credits of GRAD 5920: Master's Thesis Preparation. It should be noted that M. A. students desiring to continue for a Ph.D., here or at another university are strongly advised to register a thesis. There are many types of appropriate theses. Options for completing a thesis or thesis equivalent include:

1. Original Research Project

In this option, the most traditional type of M.A. thesis, students design a study in which they collect data, and write a thesis entirely on their own data. This should be done in close collaboration with one's advisor, so that the process does not overwhelm the student. A wide range of topics and approaches are satisfactory to the Department, dependent on agreement by one's advisory committee. These include quantitative and qualitative studies or policy analysis, etc.

2. Replication

In some instances a thesis can take the form of a replication of a previously conducted study. Re-doing a study with additional controls or a younger or older age sample are examples of how a replication can serve as an M.A. thesis. .

3. Secondary Data Analysis

Today more so than ever before in the history of the field, there are national data sets available that can be used for research purposes. There are faculty in the department who are able to help students access and use these archived data bases. Students are able to use these resources for their M.A. theses involving topics such as poverty and child development, women's employment and parenting roles, parent-child relations, and health and mental health issues among cancer survivors and in members of minority families. Alternately, several faculty members have interview and other data sets available that have not yet been analyzed. The use of these materials is an appropriate route for an M.A. thesis and benefits all concerned.

4. Ongoing Research

Another route used for completing the thesis requirement is through involvement with faculty or doctoral research that is being planned or is underway. M.A. students might collaborate on or extend these ongoing projects in ways that are mutually beneficial to all involved.

5. Jointly Conducted Investigation Across Graduate Students

On a few occasions in the past graduate studies have jointly conceived and conducted a research project that served as a basis for their respective M.A. theses. . In this case, the students might share in the design and execution of the study, but focus on different research questions or aspects of the study for their respective theses. Put another way, a joint project can benefit students when there is mutual help and productive sharing of data. The separate M.A. theses report the common elements but analyze and interpret different aspects of the study.

6. Completion of the Certificate in Program Evaluation through the Department of Educational Psychology

The required project for the Certificate in Program Evaluation through the Department of Educational Psychology may satisfy the M.A. thesis requirement in HDFS contingent on the approval of the advisory committee. The thesis must conform to the guidelines for preparing the thesis, scheduling the defense, and necessary steps for submitting posted by the Graduate School. Details for the Certificate in Program Evaluation can be found on the Ed Psych website:

(http://www.education.uconn.edu/departments/epsy/mea_gcpe.cfm)

A thesis equivalent at the M.A. level is a published or under review research article to which the graduate student has made substantive contributions as attested to by their co-authors and/or agreed upon by their faculty advisor. Students electing the Certificate in Program Evaluation may use their evaluation project as a thesis equivalent of a M.A. thesis if approved by the student's advisory committee.

The Graduate School website (www.grad.uconn.edu/masters.html) provides guidelines for the preparation of the thesis, scheduling the defense, and necessary steps for submitting the thesis

Timing in the M.A. Program

A faculty advisory committee should be formed *before* the end of the student's first full-time year in the M.A. program, and as early as reasonable according to the student's plans and goals. According to the policies established by the Graduate School, this committee must consist of *at least* three members of the Graduate Faculty (which includes most but not all members of the faculty), at least two of whom must be in the Department of Human Development and Family Studies. The Major Advisor is automatically the chair of this committee. More detail on advising is given later in the Handbook.

Plan of Study

The Graduate School requires that students submit an approved Plan of Study (POS) to the Graduate Records Office when they have completed approximately half of their expected course work. Practically, this means that the POS should be submitted near the completion of the second semester of the first year of full-time graduate study. To be able to file a POS a student must have a Major Advisor and a full advisory committee. Once completed, changes to the POS requires the submission of a "revision to the plan of study form" that must be approved by the student's advisory committee.

Students design their POS in conjunction with their advisory committee. In doing so, M.A. students are encouraged to:

1. enroll in HDFS research methods courses (e.g., HDFS 5005 and/or 5004) and statistics or quantitative or qualitative methods courses related to their research goals and objectives;
2. take HDFS courses in what they define as their area of interest and,
3. "round out" their programs by electing to take an independent study, HDFS 5000: Investigation of Special Topics, and/or a Research Practicum (HDFS 5030) with an appropriate faculty member to provide them with more detailed investigations within a specialized area. Plan of Study forms (Plan A [with thesis] and Plan B [non-thesis]) are available on-line at (<http://www.grad.uconn.edu/forms.html>).

* Students completing the Certificate in Program Evaluation in the Department of Educational Psychology may have up to 14 credits from that certificate count toward their HDFS POS.

The typical number of credits in the M.A. program is about 30 course credits plus nine thesis credits. The number of credits for students pursuing clinical training through the MFT program is approximately 55-60.

A master's degree must be completed within six years according to Graduate School regulations. However, the overall time for completion of a master's degree is expected to range from 1½ to 2½ years. This is likely to include two years of full-time graduate study and may also include contiguous summers.

Faculty Advisory Committee

A faculty advisory committee should be formed *before* the end of the student's first full-time year in the M.A. program, and as early as reasonable according to the student's plans and goals. According to the Graduate School requirements, this committee must consist of *at least* three members of the Graduate Faculty (which includes most but not all faculty), at least two of whom must be in the Department of Human Development and Family Studies. The Major Advisor is automatically the chair of this committee. More detail on advising is given later in the Handbook.

Oral Examination

All students within the M.A. program are required to complete an oral examination. The oral examination is seen as providing closure on the M.A. program experience. It is an educational experience that provides students with an opportunity to demonstrate their competence within their area of specialization within a professional setting.

The oral examination will be scheduled late in the student's program. If the student has written a thesis, the oral exam will be a presentation of that thesis. If a student chooses to not register a thesis with the Graduate School, his or her oral presentation will concern the thesis equivalent paper. The student's advisory committee will determine the scheduling, format, and focus of the oral exam.

Prior to taking the oral examination, the student must prepare The Report on the Final Examination for the Master's Degree form for the signatures of his/her Major Advisor and members of the advisory committee. The form is available at www.grad.uconn.edu/forms.html. Immediately following the examination, the student must provide the HDFS Associate Department Head for Graduate Studies with the original signed form and three copies. The Associate Department Head will submit the original to the Graduate School and return copies to the Major Advisor and student and will place the remaining copy in the student's file in the HDFS graduate office.

B. THE DOCTOR OF PHILOSOPHY PROGRAM

The Human Development and Family Studies (HDFS) program is one of a very limited number of programs in the U.S. that offers a Ph.D. in Human Development and Family Studies (HDFS). Ph.D. students will develop an area of specialization in conjunction with their Major Advisor and the members of their advisory committee. The research conducted by doctoral students in the Department is expected to be original, of high quality, and to extend the existing research within the HDFS field.

Admission to the Ph.D. Program

Students are admitted into the Ph.D. program based on clear evidence of their scholarly potential. Admittance may be attained via one of three routes:

1. The traditional route is one in which the applicant has completed a master's degree with a research thesis within HDFS or within a related field of study.

2. It is possible, as well, for an applicant who has completed a master's program in HDFS or a related field without having conducted a thesis to be admitted to the doctoral program if they can present evidence of their scholarly potential in the form of work that the HDFS Admissions Committee considers the equivalent of a research thesis. An example of work that might serve as the equivalent of a research thesis is (co-) authorship of a published article with letters from mentors attesting to the quality of the applicant's contribution to the work. Students admitted to study for the degree of Doctor of Philosophy may earn a Master's degree in HDFS under either Plan A or Plan B of the Graduate School.

3. Students may be admitted with no post-baccalaureate training (i.e., directly from a bachelor's degree) if they show substantial scholarly potential in the form of work that the HDFS Admissions Committee considers the equivalent of a research thesis. Examples of work that might demonstrate this potential include evidence of high-level research-focused courses, letters from faculty with whom the student did undergraduate research, an undergraduate Honor's thesis that was research-based, employment as a research assistant involved in multiple aspects of significant research investigations that resulted in (co-) authorship of a published article with letters from mentors attesting to the quality of the applicant's contribution to the work. Students admitted to study for the degree of Doctor of Philosophy may earn a Master's degree in HDFS under either Plan A or Plan B of the Graduate School (i.e., the student is required to complete a master's thesis or thesis equivalent as a step in his or her Ph.D. program).

Regardless of route, the Graduate Record Examination (GRE) is required as part of the application process. In rare instances, an applicant may request a waiver of the GRE; such requests will be evaluated on a case-by-case basis. A formal written request for waiver with a detailed explanation of the reason for the request must accompany the application for admission.

Requirements of the Program

The Graduate Faculty of the HDFS (then the School of Family Studies) approved the following curriculum for all Ph.D. students matriculating in Fall of 2000 and thereafter. A student may request a waiver of required core courses if she/he has completed similar course work. However, the waiver must be discussed with and approved by the student's Major Advisor *and* the Associate Department Head for Graduate Studies. In some cases, the student will be asked to discuss his or her background and qualifications with the instructor of a specific course to allow that faculty person to have input into the decision as to whether or not to waive the requirement.

Please Note: *The student should always consult the current University of Connecticut Graduate Catalog for detailed descriptions of general requirements for the Ph.D. degree.*

The Ph.D. Degree in Human Development and Family Studies Curriculum

Areas of Research Specialization

The Ph.D. in HDFS needs to be viewed from multiple perspectives. First and foremost, the "field of study" of the degree is "human development and family studies." This means it includes examination of theory, research, and intervention/practice and their interplay across the full lifespan of individual development and within the context of family and social systems. It also includes an appreciation for, and exploration of, the diverse ways in which persons develop within their social and familial contexts. Thus, it includes a core curriculum designed to provide all students with that foundation.

All students' programs of study within the graduate program involve an emphasis on:

- Lifespan Human Development (in ecological context)
- Diversity & Culture
- Promoting Healthy Individuals and Families (prevention, intervention, and policy)
- Basic and Applied Research

Second, all doctoral students will develop an "area of specialization" that will be reflected in their plan of study and serve as the basis for their doctoral research. For most students, this area of specialization will be within one of six well-developed areas of faculty research within the Department. All include a focus on how human development and family relations are inextricably linked. These areas are:

- **Couple Relationships** - Several of the faculty and graduate students within the program are interested in the patterns, dynamics, and characteristics of same-sex and other-sex romantic relationships in diverse populations. Some of the topics actively being studied in our department include:
 - social and cultural contexts of marital relationships;
 - marital processes and risks associated with the probability of divorce;
 - postdivorce adjustment; remarriage and stepfamilies;
 - identity formation and negotiation during family transitions (e.g., parenthood, (re)marriage, divorce);
 - sexuality among racial, ethnic, and sexual minorities; sexual and reproductive health;
 - intra- and interpersonal characteristics of high conflict couples; therapeutic interventions for couples;
 - methodological and measurement issues with dyadic data;
 - family of origin experiences as these relate to the structure and experience of adult partnerships.
- **Gerontology** - The gerontology specialization in HDFS provides students with a comprehensive background in theory and research in social gerontology, within the broader context of Human Development and Family Studies, highlighting the value of aging and the positive aspects of development. The curriculum is flexible so that students can pursue areas of individual interest. A certificate in gerontology is available for Master's and Doctoral students. Students can receive hands-on experience through individualized supervised field placements, research assistantships, an active mentoring program, and opportunities to interact with professionals in the field of aging through a formal lecture series. Faculty researchers aim to improve the health and well being of older individuals and communities by engaging in collaborative, multi-disciplinary research. Current research includes projects that aim to:
 - Analyze the effects of federal, state and local policies on the lives of older adults, their families and caregivers.
 - Improve housing and long-term care environments for older adults in the State of Connecticut and across the nation.
 - Understand the impact of chronic illness, particularly cancer, on the health and well being of older adults and their families in the United States.
 - Examine the needs of caregivers and care-receivers to help identify services and/or programs to assist in providing quality care to family members.
 - Understand the influence of culture, gender, and race on aging, health, and health disparities.

- **Health and Well-Being in Social Context** - Faculty and graduate Students in this area of specialization are concerned with investigation into the processes that promote health and well-being at the individual, familial, community, and societal levels. Working within a Human Development and Family Studies framework, researchers examine these processes across the life span and in interaction with socio-economic, community, cultural, environmental, and institutional systems. Adopting the World Health Organization's definition of health as "a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity," HDFS faculty use multidisciplinary and interdisciplinary approaches as well as a variety of quantitative and qualitative methods to better understand the social and psychological contexts of health and well-being.

Research projects in this area encompass basic, applied and policy-oriented research. Some of the numerous topics actively being studied in our department include:

- prevention and intervention activities in various contexts and across the life span;
- strategies for coping with chronic illness and disabilities;
- children's conduct and mood disorders;
- youth development;
- risk, resilience, & interventions for at-risk youth and families;
- postpartum depression;
- cancer survivorship and personal development;
- family law and policy.

Graduate students in HDFS are offered opportunities to be involved at all levels of research via investigator-initiated, externally-funded grants as well as through government-funded contracts. Research practicum experiences in health and policy settings are encouraged as students progress through their doctoral experience.

- **Marriage and Family Therapy** – Engaging students and faculty in collaborative clinical, research, and educational activities, the MFT program's mission is to provide highly qualified professionals at the master's and doctoral level, who possess the knowledge, skills, and dispositions to improve the quality of well-being, for individuals, families, and wider social systems. The MFT program in the Department of Human Development and Family Studies is dedicated to promoting cultural competence in addressing diverse local, national, and global communities. Our training philosophy also includes a strong emphasis on the self of the therapist. The development of skills must be balanced with attention to personal growth and development of the therapist as genuine, empathic, and responsive to clients, peers, supervisors, and others in one's relational network.

The faculty is committed to preparing individuals who can serve as leaders in the field of marriage and family therapy. Some will choose to become highly trained practitioners. Others will choose to become leaders in research and theory. Regardless, we believe that all students must possess a solid grounding in the basics of clinical practice, research, and theory. The rapid developments in the field of marriage and family therapy over the last several decades demands that those entering the field have a broad appreciation for the knowledge base that informs MFT and an understanding of the challenges facing the profession as it continues to evolve.

The COAMFTE-Accredited Master's and doctoral training provide high-quality, comprehensive education in the field of marriage and family therapy. Building on the Department of Human Development and Family Studies mission, the MFT program works with local, state, national, and international partners to advance the knowledge base and strengthen the conditions that enhance family functioning. Clinical training and outreach gives balanced attention to the range of physical/organic, interpersonal, relational, and cultural/contextual factors that can cause or exacerbate

the issues presented for treatment. Emphasis is placed upon multiple points of intervention that can foster positive change within clients' life space and interrupt constraining interactions that may exist in their wider socio-cultural and sociopolitical context. Faculty researchers in the field of marriage and family therapy have a variety of research interests including:

- theory building,
- creating facilitative environments for optimal family functioning,
- promoting equity and social justice,
- advancing effective clinical supervision and training
- examining the process and outcomes of therapy.

- **Parenthood and Parent-Child Relationships** - Our department has remarkable breadth and depth in the area of parenthood and parent-child relationships. A large and strong group of researchers are concerned with aspects of parenting which, in aggregate, covers the lifespan, addresses multiple aspects of social contexts, encompasses both basic and applied research, and addresses a large number of outcomes associated with parenting. Several important parenting intervention programs and lines of research evaluating parenting intervention have their origins or are currently based in our department.

Some of the topics actively being studied in our department include:

- how parenthood is construed in different cultures and in different economic contexts;
- caregiving relationships between children and their aging parents;
- couples' parenting priorities and division of parenting labor;
- young children's empathy and parent-child relationships;
- parenting biracial teenagers;
- parental acceptance;
- foster and step-parenting;
- child temperament
- how family of origin experiences impact on the structure and experience of parenthood and parenting

- **Prevention and Early Intervention** - Prevention and early intervention policies and practices that address health, education, economic behavior, relationships, and well-being are prevalent in our society and throughout the world. Prevention and early intervention can be engaged in at any point in the lifespan. In the department of Human Development and Family Studies, graduate students have the opportunity to study and engage in prevention and early intervention training with faculty specializing in Family-level Prevention, or Infancy-, Childhood-, and Youth-level Prevention, or Adulthood-level Prevention. Faculty are involved in studying implementation and outcomes of programs that provide:

- paraprofessional and professional infant mental health services
- supportive housing programs for at risk families with young children
- teacher training in early care and education settings
- case worker training targeted for youth transitioning from foster care to adulthood
- paraprofessional and professional educator training in after school programming
- youth mentoring in a variety of settings
- family-focused diversion models for youth at risk
- supportive housing programs for families or elderly and disabled persons
- reduction in disparities that limit access to health care

Graduate students play an important role in the design and evaluation of prevention and intervention efforts that are implemented at the local, state, and national levels. Student involvement ranges from gathering policy information from community or state agencies, to observing and documenting program activities with families or children, to project management that includes supervision of undergraduate students involved in activities with children and youth, to providing or evaluating parent education or individualized interventions to families enrolled in prevention and early intervention programs.

The HDFS faculty is committed to providing opportunities for advanced study that are both responsive to the individual needs and goals of students chosen for HDFS matriculation and consonant with the goals and expertise of the faculty. Students and their advisors have considerable latitude in defining an area of specialization. Most individual students are likely to elect to have one of these areas of specialization. However, some students may prefer to use a broader definition of their program, based on a thematic approach to their studies that may span several of these areas. Unique configurations may be developed and pursued as long as the student ascertains that there are sufficient faculty and resources available to work with the student in her or his specialization area. Students typically complete 21-24 credits in their chosen specialization area.

Students should select courses that reflect a combination of the core HDFS graduate curriculum for all students, regular courses available in their area of specialization from throughout the University, and special courses, such as Special Topics (HDFS 5000), Research Practicum (HDFS 5030), Practicum in Teaching (HDFS 5010), and other practicum and internship experiences related to policy, and practice. Although a student need not choose a specialization, those who do so will have a clearer direction for advising.

Through a process of discussion, reflection and negotiation with her/his Major Advisor and advisory committee, a student will develop a doctoral Plan of Study (POS) that reflects the structure of our Human Development and Family Studies program. The POS will include:

- Required Core Courses;
- Methodology Courses;
- Area of Specialization or Thematic Courses;
- Practicum Experiences and/or Apprenticeships; and
- 15 Graduate Dissertation credits (GRAD # 6950).

It should be noted that the Graduate School requires that an approved *Plan of Study for the Degree of Doctor of Philosophy* be on file in the Graduate Records Office approximately when half of the expected course work has been completed. Practically, this means that the POS should be submitted in the second year of course work – though students can submit their POS later than their second year within the program. The student should plan on completing and submitting a POS as soon as the course work that has been taken and will be taken is clear. The POS form is available at <http://www.grad.uconn.edu/forms.html>.

Course of Study

The goal of course work is to provide each student with the prerequisite knowledge, skills, and abilities to be a contributing professional working in the area of human development and family studies. Overall, the intent of course selection is to enable the student to understand the dynamic interplay between human development and family systems from a lifespan perspective. In addition, recommended coursework

focused on the areas of statistics and research methods is designed to prepare students to conduct high quality research.

There is no specific number of courses that are required beyond the minimum expected by the Graduate School, within the structure of the curriculum as outlined above. Instead, the student consults, in the early stages, with her or his assigned Major Advisor and, later, with a chosen Major Advisor and committee to develop a comprehensive POS.

Typically, such course work comprises approximately 50-60 course credits (post-M.A. with thesis) or 80 – 85 credits (post baccalaureate or master's without a Master's thesis) including an appropriate combination of courses oriented towards human development, family dynamics, family systems, prevention, intervention, and policy. Practicum, apprenticeship, and internship activities are also components of the Ph.D. program in HDFS.

REQUIRED CORE COURSES for all Ph.D. students in HDFS * - 19 credits

HDFS 5215	Models and Concepts of Lifespan Human Development
HDFS 5310	Patterns and Dynamics of Family Interaction
HDFS 5311	Theories of Family Development
HDFS 5340	Prevention, Intervention, and Policy Approaches in Family Studies
HDFS xxx	One course in child or adolescent development
HDFS yyy	One course in adulthood or aging

METHODOLOGY COURSES * - 12-15 credits selected from the following:

HDFS 5003	Research Methods in Human Development and Family Relations I
HDFS 5005	Qualitative Research Methods in HDFS
HDFS 5004	Research Methods in Human Development and Family Relations II
EPSY 5605	Quantitative Methods in Research I
EPSY 5607	Quantitative Methods in Research II (or appropriate advanced research courses with focus on quantitative or qualitative methods with approval of advisory committee)

AREA OF SPECIALIZATION OR THEMATIC PROGRAM ADVANCED COURSES *-

Approximately 21-24 credits

Using the current research specialization topics (See Areas of Specialization section, pp 11 –13), students and their advisory committees will select an appropriate mix of basic and advanced courses, independent study, and research activities to develop a high level of expertise in a selected area of study.

PRACTICUM EXPERIENCES/APPRENTICESHIPS * – Credits determined by advisory committee; approximately 3-6 credits

This includes some combination of teaching, applied research/policy, service/outreach, and basic research apprenticeships as appropriate for the student's plan of study.

*** Please Note:**

Doctoral students specializing in MFT have additional required and recommended courses, clinical internships, and professional experience requirements. Students are referred to the Marriage and Family Therapy Program Handbook for specific information pertaining to their degree and licensure requirements.

Student Portfolio

As of matriculation beginning in Fall 2008, Ph.D. students will complete a student portfolio. This policy applies to students entering the Ph.D. program beginning August 25, 2008 and after.

All of the benchmarks and criteria apply to Ph.D. students who matriculate with a B.A./B.S. degree; some apply to students who matriculate with a non-thesis M.A./M.S. degree; and others apply to students who matriculate with a thesis M.A./M.S. degree and to thesis M.A. students. The number of presentations/posters, manuscripts, etc., indicated are minimal requirements for satisfactory progress or completion of the Student Portfolio and requirements for the degree. Regular presentation of products, such as presentations and posters, in departmental venues such as research seminars, colloquia, etc., will be expected but not explicitly required.

Many of the items in the Portfolio will be part of a publicly-available package for each student, but selected items, such as evaluations and grades, will not be part of that publicly-available Portfolio. However, they will be included in the student's file and used in the Annual Review process. Timely progress in fulfilling these benchmarks will be evaluated during the Annual Review, and students will be given appropriate feedback and guidance.

Benchmarks and Evaluation Criteria

#	Benchmark	Evaluation Criteria
1	Core courses and examinations. Courses should incorporate "essential" readings.	Instructor grade
2	Approved and completed M.A. Plan of Study.	Approved by Advisory Committee; submitted to HDFS Associate Department Head for Graduate Studies and the Graduate School.
3	Completion of <i>Professional Proseminar</i> and <i>Professional Development Modules</i> on research ethics, standards, and procedures.	Grade in Proseminar, evidence of completion of required training.
4	M.A. thesis for students who enter Ph.D. program without a Master's Thesis or its equivalent (i.e., published or in press research article in peer-reviewed journal) in HDFS or related area.	Approval by committee and oral defense to department. Paperwork submitted to HDFS Associate Department Head for Graduate Studies and the Graduate School.
5	Student membership in appropriate national organization(s) required. Participation in departmental, state, regional, national, or international organizational activities strongly encouraged throughout graduate career.	Evidence of membership in national organization(s) and participation in activities at departmental, local, state, regional, and national levels.

6	Three presentations/posters at state, regional, national, or international conferences, as primary presenter or as part of a research team. Can include one presentation/poster presented prior to entering the program but at least two must be submitted while at UConn and presented (or scheduled to be presented) during the student's UConn graduate career. Those can occur at any point throughout graduate career. One of the presentations <i>may</i> be completed after submission of the Preliminary Portfolio and completion of the Literature Review.	Power Points slides/posters, papers, or other formats of presentation. If student is 3 rd + author, then she/he should complete and include checklist form explaining role(s).
7	Authorship of two manuscripts <i>published, in press, or submitted</i> to peer-reviewed journals or as chapters for edited volumes. Can include one article submitted prior to matriculation. <i>At least one</i> manuscript must be completed and submitted at any point throughout the student's graduate career in the HDFS Ph.D. program. One of the manuscripts <i>may</i> be completed after submission of the Preliminary Portfolio and completion of the Literature Review.	Manuscripts and editorial reviews, if available, of article submitted to a peer-reviewed journal or book editor. If student is 3 rd + author, then she/he should complete and include checklist form explaining role(s).
8	Approved Ph.D. Plan of Study.	Approved by Advisory Committee. Submitted to HDFS Associate Department Head for Graduate Studies and the Graduate School.
9	Preliminary Portfolio	Preliminary Portfolio, including current CV and materials indicated in evaluation criteria for items 1-8, submitted to and approved by Advisory Committee. Submitted to HDFS Associate Department Head for Graduate Studies.

10	<p>Comprehensive/General Exam/Literature Review: a comprehensive, critical review of the literature in a substantive area of the student's scholarly area of interest. Topic of literature review to be determined by the student's advisory committee. Literature Reviews must demonstrate the student's command of the literature and the ability to synthesize and explain the theoretical, conceptual, and empirical knowledge on the chosen topic. This paper is to be completed independently by the student.</p>	<p>Cannot be submitted before approval of Preliminary Portfolio. Evaluated by the Advisory Committee plus two additional department faculty designated for this purpose by the HDFS Associate Department Head for Graduate Studies. If all reviews indicate a pass, then the exam is complete. In the event that one or more reviews call for a fail, then detailed assessments of the paper by all reviewers are submitted to the ADH for GS, who has the discretion to pass the exam (if all advising committee members and one of the additional reviewers have rated the paper a pass, and the ADH for GS is in agreement) or call a meeting of the advising committee, two additional reviewers, and the ADH for GS in order to confer and seek consensus about a decision of pass or fail. A decision to pass must be approved unanimously by the advising committee. If not passed (i.e., decision is fail), the student will have one (and only one) opportunity to rewrite the Literature Review based on the detailed feedback provided by all reviewers. Upon approval, the ADH for GS will report to the Graduate School as successful completion of the comprehensive/general exam.</p>
<p>Remaining Benchmarks (and Portions of Those above as Indicated) Will be Completed after Completion of Preliminary Portfolio, Submission Of Comprehensive/General Examination and Notification by the Graduate School of Ph.D. Candidacy</p>		

11	<p>Dissertation Proposal.</p>	<p>Proposal approved by Advisory Committee and reviewed/evaluated by at least two members of the faculty in addition to Advisory Committee. Following a review of the written dissertation proposal by the student's advisory committee, the dissertation proposal will be presented orally to department faculty (minimum of two additional faculty, beyond the advisory committee) and then revised in accordance with discussion at defense and discretion of the Advisory Committee. Dissertation proposal with signed approval page by Advisory Committee, noting additional faculty who participated in the oral defense, submitted to HDFS Associate Department Head for Graduate Studies for transmission to the Graduate School</p>
----	-------------------------------	--

12	Teaching experience, including as solo instructor, OR internship in research/teaching/clinical service settings.	Concomitant enrollment in appropriate supervisory course, including evaluation by supervisor. Syllabi and evidence of approach/philosophy for teaching.
13	Complete, Final Portfolio.	Portfolio, including current CV and all materials relevant to items 1-12 (e.g., the Preliminary Portfolio materials plus the Literature Review, Dissertation proposal, and evidence of teaching/research/clinical service), submitted to and approved by Advisory Committee. Submitted to HDFS Associate Department Head for Graduate Studies.
14	Dissertation.	Approval by student's Advisory Committee; Presentation to audience, including at least five faculty members as required by the Graduate School. Submitted to the Graduate School by major advisor and student.

Lasted revised 8/12/2010

Comprehensive/General Exam

The Comprehensive/General exam approved by the Graduate Faculty consists of a comprehensive, critical literature review of the literature in a substantive area of the student's scholarly area of interest. Topic of literature review to be determined by the student's advisory committee. Literature Reviews must demonstrate student's command of the literature and the ability to synthesize and explain the theoretical, conceptual, and empirical knowledge on the chosen topic. This paper is to be completed independently by the student.

The Comprehensive/General Exam will be evaluated by the Advisory Committee plus at least two additional faculty designated for this purpose by the Associate Department Head for Graduate Studies. The exam cannot be submitted for review before approval of the Preliminary Portfolio. The exam must be approved by at least four of five reviewers. If not passed, a student will have one opportunity to rewrite the Comprehensive/General Exam based on comments by reviewers. The resulting reviews will be reported to the Associate Department Head for Graduate Studies for transmission to Graduate School as completion of Comprehensive/General exam. See Benchmarks Table for procedures to resolve mixed reviews of the Comprehensive/General Exam.

Dissertation

Planning Process

After successfully completing the Comprehensive/General Exam, the student will construct his or her dissertation research project and proposal. The dissertation project should provide a significant and unique understanding of an appropriate topic in HDFS and upon its completion should make a significant contribution to the field. In the process of designing and conducting the research project, the student will become one of the world's experts on that particular topic. To that end, the planning process requires the student to develop a depth of understanding of the literature in the area of specialization concerning the

topic of interest and a proven ability to use appropriate methods to explore the topic and analyze resulting data in a professional way.

The planning process as well as the dissertation research itself will take a significant portion of the student's time and effort in the Ph.D. program. Towards that end, any students matriculating beginning in Fall 1998, or later, are to take at least 15 credits of dissertation preparation (GRAD 6950). Timing of these credits will be worked out with the Major Advisor and the advisory committee. Typically, the time necessary to complete the dissertation will be at least one year of essentially full-time commitment.

Dissertation Proposal

After successfully completing the Comprehensive/General Exam/Literature Review, doctoral students must submit a Dissertation Proposal for approval by their advisory committee. The proposal is to be typed and double spaced, and it should be prepared with care and attention to style required for scholarly writing and publication. It should specify Background, Purpose for the Research, Research Question, Methods and Procedures, Analytic Procedures, Significance, and Limitations. It should be approximately 20 double-spaced pages in length of text, maximum of 25. Please note that the Graduate School form indicates that ten pages should be sufficient to provide adequate detail, but in our experience a well-constructed proposal will require more than ten pages of text. However, the general emphasis on being concise is indeed important. For example, the literature review should not contain the kind of detail expected in the dissertation but, instead, should provide essential information to enable reviewers to understand the goals and procedures of the proposed research.

Each student's advisory committee oversees the construction of dissertation proposal. When the advisory committee approves the proposal, each committee member must sign the Dissertation Proposal for the Ph.D. Degree approval page. The Graduate School provides detailed instructions for procedures as well as forms at <http://www.grad.uconn.edu>. Again, however, students should ignore the length of ten pages indicated on the form.

Oral Defense of the Dissertation Proposal

Following preliminary approval of the written proposal by the Advisory Committee, the student will undertake an announced oral defense with the Department faculty (minimum of two faculty outside of the Advisory Committee). Revisions may be suggested during the Oral Defense and the student will complete as required by the Advisory Committee. Successful completion of the dissertation proposal will be acknowledged by the Advisory Committee by signing the Dissertation Proposal for the Ph.D. Degree form (at least 3 original copies). The Associate Department Head for Graduate Studies will sign the original forms. One copy of the dissertation and original signature page are required to be held in the Department and one must be submitted to the Graduate School.

Upon submission to the Graduate School, a *pro forma* consideration and approval process will be conducted by the Executive Committee of that group, at which point the student will be allowed to deposit the dissertation upon its completion. *Please note that at the latest, the dissertation proposal final approval should be at least six months before the expected date of degree completion.*

Dissertation Research

Subsequently, the student and her or his advisory committee are responsible for completion of the dissertation in the form and manner proposed. Of course, relatively minor changes to the project may be made as the study or studies proceed. However, if the dissertation is altered dramatically, the student *must*

resubmit the new dissertation version to the Graduate Faculty of the HDFS and the Graduate Council of the Graduate School for reconsideration.

Oral Defense of the Dissertation

The final stage of the dissertation process, doctoral candidates are required to participate in an “oral defense” of their study. The defense occurs after the advisory committee has approved the dissertation as complete. The *Graduate Catalog* and Graduate School Records Office *must* be consulted to insure that all formatting, announcements, and schedule requirements of the Graduate School are complied with fully.

Please Note: *A listing of resource materials designed to facilitate the successful completion of a dissertation is presented in Appendix C.*

Advising and Review Process

Advising and Advisory Committee (see also Section III on Advising and Conflicts)

A critical element influencing progress and satisfaction with the graduate program is advising. The most important person in that regard is one’s Major Advisor. When a student is admitted to the Ph.D. Program she or he is assigned a Major Advisor. The Graduate Admissions Committee (GAC), working with appropriate members of the faculty, assigns a Major Advisor on the basis of the apparent best combination of student and faculty interests and faculty advising loads. This preliminary Major Advisor provides consultation for initial course choices. However, as soon as possible in a Ph.D. student’s career—and not later than completing a year of full-time course work or its equivalent in part-time work—the student should select a permanent Major Advisor and in tandem form an advisory committee. This selection may be an affirmation of the assigned Major Advisor *or* it may be a different faculty member who is a better fit for the completion of the student’s graduate career in HDFS.

The Major Advisor serves many important roles. She or he:

1. Advises on class content, initially solely and later in conjunction with the student’s advisory committee;
2. Recommends appropriate members for the advisory committee;
3. Chairs the thesis or dissertation committee;
4. Provides the student with opportunity for professional exposure and advancement (informing about appropriate organizations, workshops, providing opportunities for co-presentations, etc.);
5. Works with the student to insure appropriate progress and satisfactory completion of all requirements;
6. Reports to the Associate Department Head for Graduate Studies and the entire Graduate Faculty about the student's progress; and
7. Fulfills the goal of providing each student with a high quality education that is the foundation for professional advancement and satisfaction.

A successful relationship with a Major Advisor requires that a student must have reasonable expectations for what can and cannot be done by the advisor. Information about resolving potential conflicts in this relationship is provided later in this document (pp. 26-27).

The second step after forming a relationship with a Major Advisor is selected is to complete the Advisory Committee with at least two other members of the Graduate Faculty. According to the Graduate School requirements, the advisory committee must consist of *at least* three members of the Graduate Faculty (which includes most but not all faculty), at least two of whom must be in Human Development and

Family Studies. The Major Advisor is automatically the chair of this committee and oversees the general examination and dissertation process. Exact composition of this critical committee depends on the individual student's interests and needs. The advisory committee will be responsible for:

1. Reviewing and approving the POS, which is a list of all course work applied to the Ph.D.;
2. Participating in the development and subsequent evaluation of the publishable review of related literature or grant proposal component of the General Exam;
3. Working with the student in all stages of the dissertation project from preparation of the proposal, to writing, to oral presentation;
4. Working in close collaboration with the student on Institutional Review Board (IRB) matters; and,
5. Evaluating and approving the thesis and/or dissertation, and
6. Completing all required paperwork and meeting appropriate deadlines.

Yearly Review of Doctoral Students

Purpose

- To preserve the academic integrity of the program;
- To invest resources in students excelling in their field; and
- To provide constructive guidance to students in the progression of their program.

Annual Reviews

1. In January of the student's second year, the following is expected:
 - Significant progress on core courses.
 - Completion of *Professional Development Modules* on research ethics, standards, and procedures.
 - Student membership in at least one appropriate national organization.
 - M.A. Plan of Study approved and submitted.
 - *Submission* of presentation/poster. This is suggested but not necessary by this time.
2. In January of the student's third year, the following is expected:
 - Successful completion of all the core courses.
 - Presentation/poster at state, regional, national, or international conference, at least as part of a team.
 - Submission of article with student as co-author to a peer reviewed journal or a chapter for an edited volume.
 - Completion of M.A. thesis, including oral defense.
 - Ph.D. Plan of Study approved and submitted.
3. In January of the student's fourth year, the following is expected:
 - Second presentation/poster at state, regional, national, or international conference.
 - Preliminary Portfolio submitted.
 - Literature review or conceptual/theoretical/applied paper submitted for review as general/comprehensive examination (may only be completed *after* preliminary portfolio submitted).

- Written dissertation proposal submitted and reviewed; oral defense of proposal before faculty Advisory Committee (may only be submitted *after* approval of completion of Comprehensive/General Exam).

4. Before degree conferral, the following is expected:

- Second article or chapter submitted; preferred as first author.
- Third presentation/poster at state, regional, national, or international conference.
- Teaching and/or service/clinical experience completed.
- Final portfolio submitted for evaluation.
- Dissertation approved, presented, and defended.

It is important to recognize that it is the student's responsibility to make satisfactory progress. All students *must* continue to register under appropriate catalog numbers every semester or the Graduate School will terminate the student's candidacy even if the student and student's Major Advisor and advisory committee feel satisfactory progress *is* being made. However, simply continuing to pay continuous registration without progress on one's course work, thesis, general examination, or dissertation is *not* considered satisfactory progress. The Major Advisor is empowered to instruct the Graduate School to terminate a student's candidacy for lack of progress.

C. ARTICULATION POLICY

Admission from the M.A. to Ph.D. within Human Development and Family Studies

It is possible for students who were admitted initially to the M.A. program to apply for continuing study in the doctoral program. Typically this occurs when the students have or are near completing the M.A. program. Successful applicants will have demonstrated an outstanding record of academic achievement and significant involvement in scholarly research (almost always including an M.A. thesis in HDFS). Successful completion of the M.A. in HDFS is *not* sufficient for admission into the Ph.D. program. Students applying from within the HDFS program to the doctoral program are required to follow all application procedures. They can ask to have certain elements of their M.A. application to be included in their Ph.D. application (that is, they may ask that GRE scores or transcripts need not be resubmitted). However, they must provide new letters of recommendation (at least some of which may be from faculty with whom they have worked in their M.A. program here) and a new personal statement. In addition, each applicant must provide evidence of his or her scholarly work or potential, in the form of a thesis, publications in referred journals to which they made significant contributions, or other scholarly products.

Current M.A. students interested in pursuing a Ph.D. should talk to their Major Advisor, other faculty, and the Associate Department Head for Graduate Studies as early as possible to discuss their interests.

II. RIGHTS, RESPONSIBILITIES, AND EXPECTATIONS

Climate Statement for the Graduate Program in Human Development and Family Studies

The faculty, administrators, and graduate students in the Department of HDFS are committed to creating a social, intellectual, and interpersonal climate that enhances the experiences of graduate students and faculty. Graduate students and faculty occupy reciprocal and interdependent positions within the University. Any effort to enhance the climate must address both student and faculty contributions to the climate.

In order to create an optimal climate, we believe that it is important to make the responsibilities and rights of both graduate students and faculty explicit. Both are to act in professional and considerate ways. The Graduate Faculty within HDFS is committed to providing the best educational opportunities that they can for graduate students. Members of the Graduate Faculty will be responsive to student needs and will work to create an atmosphere that promotes academic rigor while respecting the rights, dignity, and privacy of HDFS graduate students. At the same time, graduate students are expected to participate actively in activities both inside and outside the classroom that are important to their educational experience and contribute to the broader academic community. Active participation in the academic life in the department entails graduate students taking responsibility for their own education and taking advantage of the unique learning opportunities available in our program.

What follows represents our effort to make explicit what graduate students can expect of faculty members as instructors, advisors, and supervisors. These expectations constitute what we agree are the rights of graduate students in HDFS. This document also makes explicit what the graduate faculty believe they should be able to expect of graduate students, and these expectations constitute what we think of as the rights of faculty. In developing this statement, we have addressed rights and responsibilities pertaining to graduate instruction, advising, assistantships, and overall participation in the University community.

Mutual Rights and Obligations:

- Faculty and graduate students will communicate with respect and dignity.
- Faculty and graduate students will discuss in advance how a graduate student's involvement in a faculty member's research will be recognized.
- Faculty and graduate students are expected to follow ethical standards for professional conduct.
- Faculty and graduate students will be knowledgeable about and abide by HDFS and University grievance procedures.
- Faculty and graduate students are expected to respond to contacts and requests for information in a timely fashion.
- Faculty and graduate students are expected to take responsibility for the overall climate of the department by working to resolve problems that arise in constructive ways.

Student Rights/Faculty Obligations:

- Faculty will be knowledgeable of and abide by the University's policies regarding sexual harassment, confidentiality, and non-discrimination based on race, gender, sexual orientation, religion, and disability.
- Faculty will respond to communications from students in a timely fashion (see the Practices and Policy Statement for HDFS).
- Faculty will provide students with timely feedback concerning course work, theses, proposals, comprehensive examinations, and dissertations (see the Practices and Policy Statement for the Department of Human Development and Family Studies below).

- Faculty will respect and protect student's right to express differing opinions.
- Faculty, as professional role models, will act in accordance with the ethical standards for professional conduct of their respective professional organization (AAMFT, APA, NCFR, etc.).
- Faculty will provide a clear, complete syllabus that includes a listing of all course requirements, with due dates, distributed at the first seminar meeting.
- Faculty will start and end class on time.
- Faculty will provide concrete feedback to graduate students and suggestions for improving the quality of their work (papers and exams should be returned to students with comments and feedback).

Student Rights/Major Advisor Obligations:

- Graduate students have the right to change advisors without recrimination.
- Major Advisors will provide accurate information about requirements for successful completion of degree requirements.
- Major Advisors will meet with their graduate advisees at least twice a year to discuss courses, graduation requirements, and advisee's concerns.
- Major Advisors will complete all academic and administrative paperwork required for advisees' progress in the program.
- Major Advisors will assist students in setting educational-career goals (when asked by the student).
- Major Advisors should provide concrete feedback and suggestions for improving the quality of the student's scholarly work.

Student Rights/Faculty Supervisor Obligations:

- Faculty supervisors will provide assigned graduate assistants with clear expectations regarding requirements and constructive feedback so each student is aware of the supervisor's evaluation of his or her performance.
- Faculty supervisor's demands on graduate assistants should conform to the job description relative to the funding source.
- Faculty supervisors will provide adequate notice to graduate assistants when they request that a student work hours outside of the student's normal work schedule.
- Faculty will not expect a graduate assistant to work beyond the contracted period.

Graduate Student Obligations/Faculty Rights:

- Graduate students will attend class and keep up with assigned readings and assignments.
- Graduate students will arrive for class on time and not leave until the end of class.
- Graduate students will actively participate in their classes, while not engaging in text messaging or other activities that are distracting to themselves and others.
- Graduate students will be involved in their own professional development to enhance their knowledge, professional skills and competencies by participation in educational activities such as colloquia, brown bag presentations, informal research discussion groups, etc.
- Graduate students will keep their Major Advisor informed about their progress and possible impediments to their progress.
- Graduate students will address any problems with faculty in a constructive manner. Graduate students will deal directly with a faculty member in addressing an issue or problem or will follow the appropriate grievance procedure.
- Graduate students will respect the multiple demands on faculty members' time.
- Graduate students will understand that faculty members' contracts are nine months (that is, from the first week of the Fall semester until graduation in May). Consequently, any work with a faculty member during the summer months will be based on individual negotiations.

Graduate Student Obligations/Supervisor Rights:

- Graduate students employed as graduate assistants for the academic year will work from the beginning of fall semester to the end of the spring semester, including semester break and exam periods (8/23 – 5/22). Students and supervisors will work out arrangements for distributing hours and tasks during the year so that they may be able to take advantage of periods of time away from the University and still fulfill their obligations.
- Students employed as graduate assistants will be responsible for assisting with departmental functions, such as proctoring undergraduate exams.
- Graduate students employed as graduate assistants, work-study, student labor, and in any other capacity will keep track of their hours worked and advise their supervisor if work demands exceed or fail to meet the contracted number of hours.

Practices and Policy Statement

As a rule, the following time periods should guide the review and return of student work in a timely manner. Please note that these rules apply during the academic year and not during the summer months.

For a student paper in a class, if the paper is turned in on time then a grade should be provided in a timely fashion and entered at the latest by the end of the semester. If a student receives an incomplete grade, she/he should turn in the work within the allotted time according to University policy. The faculty member has three months to submit a grade from the time they receive the materials to complete the course work.

For thesis/dissertation proposal, advisors should make their comments and return to the student within a period of approximately four to six weeks from receiving the proposal during the academic year.

For the dissertation, advisors should make their comments and return to students within a period of six to eight weeks (depending on the number of pages to be read). If this is not possible, students should be provided with a reasonable date when they would get their dissertation draft back not exceeding three months from the time that it was received by the advisor.

Response to student e-mail or telephone messages regarding assignments for class or advising should be within three to four days unless the faculty member is attending an activity at which he or she cannot access and respond to such messages. Even then, it should not be more than a week.

Grievance Procedure for Addressing Problems

It may happen, from time to time, that a graduate student in HDFs feels aggrieved or uncertain about whether or not they have been treated fairly by a member of the faculty or staff. In such situations, there are several routes that can be taken to seek resolution or redress. Many difficulties can result from misunderstandings, and so clear communication and informal mediation are usually the most effective and least anxiety-provoking ways of addressing grievances. The first approach in most cases is for the student to request a meeting with the faculty or staff member, to state the problem politely, and to attempt a direct solution. If that proves unsatisfactory, or should such a meeting seem undesirable given the particular circumstance, there are several choices. Sometimes appropriate mediation can be provided by other faculty or staff in the Department or at other campus units such as the Women's Center or one of the cultural centers or religious institutions. Alternatively, the student may consult with the Associate Department Head for Graduate Studies and the Department Head. It is the responsibility of the academic

administrator, then, to gather the facts in the case and seek a mutually acceptable resolution. All faculty and staff in the Department report ultimately to the Department Head and formal action can be taken at that level, if appropriate. In the event that the initial collection of facts suggests a violation of law or of explicit University policy concerning prejudice or harassment, the administrator will immediately consult with appropriate staff in Human Resources, the Graduate School, or the Provost's Office regarding appropriate action.

Conflicts Concerning Major Advisors

Although most relationships between graduate students and major advisors are characterized by trust and professionalism on both sides, on occasion conflicts may arise. If, due to personality conflicts or changes in either the student's or advisor's focus of research, one or both determine that the match is not satisfactory, then they should discuss the situation with the Associate Department Head for Graduate Studies. He or she may be able to mediate the differences or facilitate finding another person who would better serve the Major Advisor role for that student.

The Associate Department Head for Graduate Studies will do everything possible to insure that the student can continue to have high quality advising. Ultimately, however, it is the responsibility of the student to find another Major Advisor; indeed, in the case of the Ph.D. program, the Graduate School requires that if another Major Advisor cannot be located within six weeks of notification by the faculty member that he or she is unable to continue to serve as Major Advisor, the student's candidacy will be terminated.

The bottom line is that it is essential to a high quality graduate experience to have a positive working relationship with one's Major Advisor. Thus, if at any point that is not the case, students are free, and indeed encouraged, to find a more suitable match. The administration of both the Department and the Graduate School are prepared to assist in any way with that endeavor. However, it is important to note that a change of advisor may mean it will take longer to complete all requirements (for example, if a change occurs in the middle of General Exam or at the dissertation stage, necessitating review by a new Major Advisor or committee member and, perhaps, a change in the content of the dissertation).

III. DEPARTMENTAL AND UNIVERSITY RESOURCES AND OPPORTUNITIES OF SPECIAL INTEREST

Brown Bag Series, Colloquia, and Informal Research Discussions

Graduate students are expected to participate actively in both formal and informal extracurricular programs and activities in the department and University-wide. Full participation as a graduate student in the intellectual life of the community involves active involvement in seminars, lectures, colloquia, brown bag presentations, student presentations, and informal research discussions. The brown bag series of presentations are informal lectures and discussions given by members of the HDFS faculty and students, faculty from related fields, and professionals from outside the University. Several program areas and centers provide regular brown bag series.

The HDFS department arranges special colloquia and seminars throughout the year. Other relevant departments and centers on campus, such as Psychology, Sociology, Women's Center, Center on Health Prevention and Intervention, also offer relevant colloquia and seminars to which HDFS students are invited.

Schedules and announcements are posted as much in advance as possible so these activities can be planned for in students' calendars and time budgets.

Supervised Field Work: HDFS 5088

Graduate students in HDFS are encouraged to include at least one semester of supervised fieldwork in their graduate program. Students should consult with their Major Advisor well in advance of enrolling in the course to determine the scope of activity and create an understanding with the supervisors at the field setting. Students in the Marriage and Family Therapy specialization have practicum or internship responsibilities that cover this experience.

Graduate Laboratory

The Grad Lab (FS 205) is available to all graduate students in HDFS. Individual workstations are available on request. Formal requests for space will be distributed to all graduate students at the beginning of each academic year. Any student may apply for space. Criteria for allocating individual workstations include ongoing work on dissertation, thesis or other research project, no other allocated space, and other extenuating circumstances underlying the request. Workstations will be awarded at the beginning of each academic year. Renewals must be submitted for subsequent years. Each year, all applications for space will be reviewed.

Students assigned to individual workstations as well as those who use the Grad Lab on a regular basis are expected to share responsibility for overseeing the use of space. To ensure the upkeep of the space, students who use the Grad Lab on a regular basis will be scheduled on a rotating basis to oversee proper upkeep of the space.

In addition to assigned workstations, a common area, kitchen, and computers and printers are available for graduate students to share.

The UConn Council on Family Relations

The UConn Council on Family Relations (UCCFR) is a professional organization for graduate and undergraduate students who are preparing for academic careers in human development, family policy, and other related areas. We are located within the Department of Human Development and Family Studies, College of Liberal Arts and Sciences, at the University of Connecticut. UCCFR is a student affiliate of the National Council on Family Relations (www.ncfr.org), an organization committed to the development and dissemination of knowledge about families and family development and relationships. Some of our activities include:

- Discussing topics related to families, family development, and relationships
- Learning and practicing research presentation skills
- Attending and presenting at regional and national conferences
- Exploring careers in human development and family studies
- Sharing experiences about graduate school with interested undergraduates

Participation in Regional and National Associations

Another important avenue for graduate students to pursue as they develop a professional identity is membership in professional organizations and societies. Opportunities are available through annual meetings, conferences, and special lectures sponsored by other universities and national organizations and their regional affiliates, such as National Council on Family Relations (NCFR), Society for Research in Child Development (SRCD), American Association for Marriage and Family Therapy (AAMFT), American Psychological Association (APA), National Association for the Education of Young Children (NAEYC), Gerontological Society of America (GSA) and the American Society on Aging (ASA). Student and associate memberships are usually invited at a fairly nominal charge. Many organizations will waive or reduce registration fees for limited service at the conference. Joining, attending, and presenting at one or more of these national organizations' meetings and conferences or their regional meetings are part of the portfolio review process. Students are encouraged also to participate in student governance in their chosen organizations. Limited funds are available through the Department and the Graduate School for attending conferences, especially when one makes a presentation or poster.

Academic and Personal Counseling Resources

Throughout the course of one's academic career, many questions may arise regarding one's career goals, personal relationships, etc. The most frequently asked question in those cases is "Who do I turn to?" Your Major Advisor or the Associate Department Head for Graduate Studies can often be of help and should be turned to first. They know the various resources available and can make referrals if necessary.

The University's Department of Career Services has expanded the list of programs offered to graduate students. Lunch & Learn Seminars, Resume & CV Assistance, Mock Interviews, and On-Campus Recruiting are just some of the offerings. For more information, visit the UConn Webpages.

Computer Facilities and Assistance

Several terminals with connections to the mainframe and personal computers with printers and basic software belonging to the Human Development and Family Studies Program are available for student use.

A significant number of these are located in the Graduate Student Lab/Lounge in Room 205 of the Family Studies Building. Additional terminals are located in the Human Development Center. Other terminals are located throughout campus. Portions of the campus, including the FSB, allow for wireless access.

The Computer Center offers regular short-term workshops designed to provide students and faculty with a working knowledge of both the software and the various programming systems available at the University. Graduate students in HDFS report that these workshops have provided them with many of the basic skills needed to proceed with the analysis of their thesis or other research data. The printed announcements describing these workshops will be posted in time to register for them. In addition to participating in the software and programming workshops, students should consider utilizing the data sets available through the Institute for Social Inquiry (ISI) data archives. These data sets include political attitude and opinion studies, socialization and youth studies, and community studies. Consult the ISI for further information.

Libraries and Archives

University of Connecticut Library System

The University of Connecticut Library system holds the largest public collection of research materials in the state. More than two million volumes are shelved in the Babbidge Library, which houses nearly three million units of micro text, 180,000 maps, 35,000 reference volumes, and subscriptions to about 5000 current periodicals. The Libraries' World Wide Web site www.lib.uconn.edu provides access to a wealth of information resources in the library, the university, and from around the world. The library home page connects to over 10,000 full text journals, primary reference sources, hundreds of research databases, online encyclopedias, and other resources.

The Thomas J. Dodd Research Center houses a number of archives and special collections of interest to Human Development and Family Studies. Special collections include the Alternative Press Collection, a repository for radical and ephemeral publications from the activist movements for social, cultural, and political change. The Alternative Press Collection contains more than 7000 newspaper and magazine titles with approximately 200 on subscription, 5000 books and pamphlets, and other sources. Other relevant collections include the Hispanic History and Culture Collections and Children's Literature.

The Human Development and Family Studies Resource Center

The Resource Center (Room 111) contains a modest but useful collection of older journals and books in HDFS-related areas, especially gerontology.

The Lyman Maynard Stowe Library, University of Connecticut Health Center, Farmington, offers extensive holdings in biomedical sciences, including books, journals, audiovisuals, and computer software. The collection includes almost 50,000 books and 5,500 journal titles.

IV. FUNDING FOR GRADUATE EDUCATION: GRADUATE ASSISTANTSHIPS, FINANCIAL AID, AND STUDENT EMPLOYMENT IN HDFS

HDFS Statement Regarding Graduate Assistantship Funding

Graduate education is expensive from everyone's point of view. Even at a state-supported institution like UConn, the tuition and fees (plus living costs) are a considerable outlay for the student, and in our fields, at least, a top-level education is not likely to bring vast wealth --the rewards are less material. From the university's point of view, the cost in faculty time means that each graduate student, especially those in clinical or doctoral training, is a net expense, not a source of income. In this context, funding for graduate studies takes on great importance.

The goal in HDFS is to provide at least half-time support (10 hours per week) and, in most cases, full-time support (20 hours per week) for Ph.D. students who request it and are making timely progress. If additional funding is available, support may also be provided to M.A. students. We consider this obligation to be for two years for students who are working toward a Master's degree, and four years for those students who eventually seek the doctorate. We make every effort to maintain funding for graduate students for that number of years at least at the level they received when the initial offer of admission was made, on the assumption that the assistance was a factor in the student's decision to accept. At the same time, because of limitations in funds, we encourage students to be enterprising and creative in developing their own funding opportunities, as illustrated in several of the categories below.

There are essentially five sources of funds for graduate students in the Human Development and Family Studies Program (beyond the student him- or herself): HDFS funds, research grants, Graduate School funds, student fellowships, and "other." The largest of these consist of the departmental portion of funds provided by the higher administration for basic functioning at the University; they provide nearly 75 percent of the assistantships. These funds come from the legislature (and hence the taxpayers of Connecticut) and from the university pool of tuition dollars. The funds are provided in the form of "assistantships" and are allocated by the department Head and Associate Head for Undergraduate Studies, in consultation with the Associate Department Head for Graduate Studies, for several kinds of purposes: primarily teaching or assisting in teaching undergraduate courses, helping in the Student Services Center and supporting essential departmental functions. These assistantships come with a complete waiver of tuition (that is, additional support from the Graduate School), and health insurance.

Funds from research grants are the second largest source in HDFS, and these also come with tuition payment and health benefits. These are funds provided by the federal government (National Institute of Health, National Science Foundation, etc.) or private foundations to members of the faculty to hire assistants in carrying out a specific research project. Sometimes these assistantships require special skills -- interviewing, data analysis, foreign language -- and the selection of assistants is the prerogative of the faculty researcher (the "Principal Investigator" for the grant). Research grants usually last between one and four years. Generally, faculty with research grants for assistantships work with the Department Head and Associate Department Head for Graduate Studies to identify appropriate students and to manage their support. Students desirous of such assistantships should make their wishes known to faculty who have or may be in the process of obtaining research funding.

A very small number of fellowships are available from the Graduate School. These include Graduate Scholarship awards, for those with outstanding academic records, and Multicultural Scholar Awards, for

students from under-represented groups. These are usually allocated for recruitment purposes or as a final step of support for students who are nearing completion of their studies.

On occasion, students obtain their own grants, usually for research, from the National Institute of Health or from foundations that have doctoral support programs, such as the Spencer Foundations. The application process usually involves a faculty sponsor, and it requires a high degree of academic maturity and motivation, but the process itself is educational and, when won, these fellowships mark an excellent beginning to an academic vita.

Finally, some HDFS students obtain assistantships from other departments at UConn for assisting in teaching, research, or student counseling.

Graduate Assistantship Appointments

Graduate School degree-seeking students who meet the criteria listed below are eligible. Appointments ordinarily are made for the nine-month period, late August through mid-May, but may be of shorter duration for a variety of reasons. Recipients usually serve the University as teaching assistants, readers, or laboratory and research assistants. They may take fewer than the usual number of courses per year because of this added workload.

To be appointed, to retain an appointment, or to be reappointed, a student must have been accorded (a) Regular (not Provisional) status, (b) must have been maintaining a cumulative average of at least B (3.00) in any course work taken, (c) must be eligible to register (i.e., must not have more than three viable grades of Incomplete on his or her academic record), (d) must be enrolled in a graduate degree program scheduled to extend through the entire period of the appointment or reappointment, and (e) must be a full-time student, counting course work and/or its equivalent together with assistantship duties throughout the period.

The holder of a full assistantship devotes one-half of available time to studies and one-half (approximately 20 hours per week) to assistantship duties, while the holder of a half assistantship ordinarily devotes three-quarters of available time to studies and one-quarter (approximately 10 hours per week) to assistantship duties. Assistantships are not available for less than 10 hours per week.

Ordinarily, a graduate student is not permitted to earn more in a given academic year than the applicable maximum stipend rate indicated below. With the written recommendation of the student's advisory committee and the consent of the Dean of the Graduate School, however, approval may be granted for a student's earnings from University sources to exceed the maximum stipend rate by a limited and specified amount.

Stipend rates for graduate assistants are calibrated in terms of progress toward the advanced degree and experience. Ordinarily, a graduate assistant may not exclude any part of the stipend from U.S. taxable federal gross income. The rates for a full-time (20 hour for two semesters) and half-time (10 hr. for two semesters) for the 2010-2011 academic year are listed at:

http://www.payroll.uconn.edu/resources/dept_admin/ga_stipend_listing_2010_2011.html

Tuition (but not the General University Fee, the Graduate Matriculation Fee, or other fees) is waived for Graduate Assistants. If an assistantship begins or terminates during the course of a semester, tuition will be prorated on a weekly schedule – charged for that portion of the semester when the assistantship is not in force, waived when it is in force. This often results in an adjustment of the tuition charges, including

partial assessment (if the student is registered throughout the semester for course work for which tuition is charged) or a partial refund (if tuition has been paid). A graduate assistant is eligible for medical benefits (health insurance). Graduate assistants should be aware that it is necessary to complete the proper forms with the Division of Human Resources to activate the health insurance. The health insurance does not take effect automatically.

In exceptional cases a graduate assistant may be appointed on a 12-month basis, with the stipend being increased proportionately. There are, however, no additional benefits or waiver of tuition in the summer months.

When students become eligible for the Level M or Level P stipend rate, it is the responsibility of their department to request such an increase promptly, by filing a new employment authorization effective the first day of the biweekly payroll period following the date on which the student completes master's degree requirements (or satisfies master's degree equivalency) or the date on which the student passes the doctoral General Examination in its entirety. Students are responsible for ascertaining that any required documentation — such as a report of a master's final or doctoral general examination, a transcript, or a report of a pertinent incomplete grade made up — is promptly filed in the Graduate Records Office and that their current stipend conforms with their eligibility.

Other Potential Sources for Graduate Assistantships

Graduate students may seek graduate assistantships outside of Human Development and Family Studies. Graduate assistantships outside of HDFS may include responsibilities for programming and services, research, administrative and technical support.

Most recently, graduate assistantship and hourly employment opportunities have been available from various centers and programs. These include Career Services, the Individualized Major program, Graduate Student Senate, Resident Honors House Supervisor, UConn Writing Center, Neag School of Education University Program for College Students with Learning Disabilities, Student Health Services, and the University of Connecticut Health Center in Farmington.

Other Types of Financial Aid

The following information is compiled from the 2009-2010 Graduate Catalog and the Graduate School website. Please refer to the catalog if you have any questions about the information about financial aid and student employment or contact the specific office directly to speak to a staff member. Visit <http://catalog.grad.uconn.edu> to access the online version of the catalog. Students are also encouraged to explore opportunities available at the Research Foundation (information is available on the Research Foundation's website at www.research.uconn.edu).

Two general types of financial aid are available: (1) aid based on academic merit and (2) aid based on demonstrated financial need. The student is advised to apply for both types simultaneously in order not to delay consideration for an award.

Awards based on academic merit include: Graduate Assistantships for teaching or research (previously discussed), University Pre-doctoral Fellowships, Dissertation Fellowships, and Summer Fellowships. Assistantships, fellowships, and other awards from University sources are used in combination with need-based aid to calculate final financial aid amounts offered either for a semester or an academic year. Application for merit aid should be made directly to the academic department. Continuing University of Connecticut graduate students should apply early in the spring semester. New applicants for admission to

the Graduate School should apply as early as possible, however no later than the deadline imposed by the appropriate academic department. (See the Graduate Admissions Application for merit aid deadlines.)

Need-based financial aid includes: Federal Direct Stafford Loans (FDSL), Federal Work-Study (FWS), and University of Connecticut Tuition Remission Grants. Citizens or permanent residents of the United States apply for need based financial aid by completing the Free Application for Federal Student Aid (FAFSA) on the web at <http://www.fafsa.ed.gov> each year. UConn's on time deadline each year is March 1 (May 1, for entering graduate students). [**Note:** International students are not eligible to receive need-based financial aid.] All need-based financial aid recipients and University funded and merit scholarship recipients must meet Satisfactory Academic Progress (SAP) requirements, which are based on federal regulations.

These requirements include maintenance of an appropriate grade point average (3.00) and satisfactory completion of a percentage (75%) of the number of credit hours attempted in each award year, as well as not exceeding published credit maximums for the student's program plan. A warning is sent to students once they have reached their degree minimums. A complete text of this policy is available at <http://www.financialaid.uconn.edu/sap>. Assistantships, fellowships and other awards from University sources are used in combination with need-based aid to calculate final financial aid amounts offered either for a semester or an academic year. Additional information regarding need-based financial aid for Graduate students is available from the Office of Student Financial Aid Services at <http://financialaid.uconn.edu/index.php/Gradprocess>. The following list of assistantships, fellowships, and other forms of aid includes only the major sources of support available to students at this University. Other sources may be available upon further inquiry.

Tuition Assistance Program for Out-of-State Master's Degree Students

This program provides tuition assistance for selected students, who are classified as out-of-state for tuition purposes, in terminal master's degree tracks. A limited number of tuition grants are awarded each year on a competitive basis to out of-state master's students. These grants permit the selected students, in effect, to pay tuition at the in-state rate. The selection criteria for these grants include: full-time matriculation in a master's degree program that ordinarily does not lead to the doctorate, absence of graduate assistantship support (which carries with it a tuition waiver), out of-state residency status, evidence of academic excellence (based on grade point averages, test scores, etc.), and U.S. citizen or permanent resident status. Each student chosen for participation in this program is eligible for a maximum of four semesters of support. This program is administered by the Graduate School. Students are nominated by faculty members in terminal-track master's degree programs.

University Predoctoral Fellowships

These are awarded by the Graduate School on the recommendation of the graduate faculty in the degree program concerned. Students who intend to earn the D.M.A. or Ph.D. and who have demonstrated capability for completing a doctoral program may apply to their academic departments for such fellowships at any stage of their graduate career. Award amounts range from small amounts to full fellowships and/or tuition equivalency. Fellowship awards do not include the requirement of teaching, research, or any other service duties and are not considered to be employment. Predoctoral Fellows must be Regular (not Provisional), full-time students, regardless of the amount of the fellowship. Recipients must present evidence of such registration and payment or deferment of appropriate fees upon receipt of fellowship checks. The Dean of the Graduate School may cancel or reduce an individual award if the student fails to maintain satisfactory academic and financial standing.

Doctoral Dissertation Fellowships

Funding may be available during the academic year to support the Doctoral Dissertation Fellowship program, which is designed to assist advanced Ph.D. students to complete their dissertations. Minimum eligibility requirements include having passed the doctoral general examination, having a fully approved dissertation proposal on file with the Graduate School, and not exceeding certain annual income limits. The amount of the fellowship is \$2,000, and the fellowships are “one-time only” awards. Awards are made via announced competitions having specific application deadlines. The number of fellowships and the frequency of competitions are limited and contingent upon the availability of funding. Inquiries may be directed to Thomas Peters, Program Director, Unit 1006, Whetten Graduate Center, room 208, Storrs, Connecticut 06269-1006; telephone (860) 486-0977; e-mail <thomas.b.peters@uconn.edu>.

Doctoral Dissertation Extraordinary Expense Award

Ph.D. students who have passed the general examination and whose dissertation proposal has been fully and officially approved may apply for up to \$500 for certain non-routine expenses directly related to data collection for the dissertation. Application may be made at any time. Awards are contingent upon the availability of funding. Inquiries may be directed to Thomas Peters, Program Director, Unit 1006, Whetten Graduate Center, room 208, Storrs, Connecticut 06269-1006; telephone (860) 486-0977; e-mail <thomas.b.peters@uconn.edu>.

Summer Fellowships for Doctoral and Pre-Doctoral Students

Students pursuing the D.M.A. or Ph.D. degree are eligible, upon nomination by department heads, for up to \$1,500 during the summer for the general examination or dissertation research. Information is available from department and program heads in March of each year.

Part-time Employment Federal Work-Study

(FWS) is a federally funded financial aid work program for students with a demonstrated financial need, as determined by information submitted on the FAFSA. Unlike other forms of aid, a Federal Work-Study award is not applied to a student’s fee bill. Students receive biweekly paychecks for hours worked.

The **Student Labor Program** is a work program open to all University of Connecticut students and designed to supplement regular staff with students seeking part-time employment. The Office of Student Financial Aid Services advertises available positions on their website: <www.studentjobs.uconn.edu>. Students are prompted to select the category y their job choice(s) and are provided with a list of supervisors seeking candidates for those jobs. Students then arrange interviews with prospective employers to discuss the details of the job.

Federal Loan Programs

Federal Stafford Loans (FSLs) are offered to students attending the University at least halftime. Subsidized FSLs are based on financial need; the interest on these loans is subsidized by the federal government. If a student does not qualify for a subsidized FSL, he or she may borrow an unsubsidized FSL. The student is responsible for the interest which accrues on the loan, and has the option to either pay the interest while in school or defer payment of the interest until repayment begins, six months following graduation. Annual loan limits for eligible graduate students are: \$8,500 in Subsidized FSL and \$10,000 in Unsubsidized FSL per academic year. After July 1, 2007, the unsubsidized loan limit for graduate students was increased to \$12,000. The maximum aggregate FSL (Subsidized and Unsubsidized) amount a graduate student may hold is \$138,500. An excellent, detailed source of information regarding federal aid programs and the financial aid process is **The Student Guide**, available at college and university financial aid offices.

Graduate Student Senate Short-Term Loan Fund

This fund is administered by the Graduate Student Senate (GSS), and is generated by graduate student activities fees. It provides loans of up to \$500 to assist graduate students in dealing with financial emergencies. Loans are issued for 60-day periods and are interest free. Borrowers are urged to repay these loans on time so that other students in need can be accommodated. Applications are available in the Graduate Student Senate Office, Room 318, Whetten Graduate Center and online at the GSS Web site <<http://www.grad.uconn.edu/~wwwgss>>.

International Students

Before their admission is complete and a student visa can be issued, non-immigrant international students must present documentary evidence of their ability to meet all expenses for at least the first year of study, together with an acceptable plan for financing the remainder of their program. International applicants are not eligible for need based financial aid. Grants providing tuition and the general University fee are available to a small number of international students who are sponsored by certain organizations [e.g., ATLAS and LASPAU] recognized by the Graduate School as being devoted to the promotion of advanced education programs and with which the University has a standing agreement.

Veterans Administration Educational Assistance & Tuition Waiver Program

The Office of Student Financial Aid Services provides information concerning benefits under the various educational assistance programs provided by the Veterans Administration. Students who attend the University and receive educational assistance under the following chapters must contact the Office of Student Financial Aid Services prior to the beginning of each semester: Chapter 31 (Vocational Rehabilitation Training Act for Disabled Veterans); Chapter 32 (Post-Vietnam Veterans Educational Assistance); Chapter 35 (Dependents Educational Assistance Act: children, wives, and widows of totally disabled and deceased veterans – service connected deaths); Chapter 1606 (Montgomery G.I. Bill - Selected Reserve); Chapter 30 (Montgomery G.I. Bill – Active Duty). Veterans must notify the University every semester of their registration for certification of enrollment. Any changes in veteran status (credit load, withdrawal, etc.) must also be reported promptly to the University. Additionally, veterans may qualify for a tuition waiver under the State of Connecticut tuition waiver program. Veterans must provide a form DD214 (separation of service) and must be recognized as a resident of Connecticut at the time of admission or readmission to the University. Please see the tuition waiver criteria in the “Fees and Expenses” section of the catalog. Veterans seeking tuition waiver applications or assistance should contact the Office of Student Financial Aid Services, 233 Glenbrook Rd., U-4116, Wilbur Cross Building room 102, Storrs, Connecticut 06269-4116 or call (860) 486-2442

Multicultural Scholars Program

The Graduate School and the Provost’s Office have established a fund for the promotion of diversity within graduate education. This program functions to promote the recruitment and retention of diverse populations of graduate students by matching the funding support provided by schools, departments, or fields of study. Students are nominated by the graduate program to which they are applying. There is no application form. Eligibility for support is based on the student’s academic qualifications, U.S. citizen or permanent resident status, and the demonstrated need for increased cultural diversity within the field of study.

Outstanding Scholars Program

The Graduate School and participating academic departments and programs offer a number of fellowships for new outstanding graduate students pursuing study at (or through) the doctoral level. Each award includes a stipend of \$8,000 for the academic year, provided by The Graduate School, and a half graduate assistantship for each of the fall and spring semesters, which is provided by the department or program.

The award is renewable for two additional years (a total period of three years). There is no application form. Each doctoral field of study should recommend as early in the recruiting year as possible applicants who intend to commence graduate study in the following Fall semester.

The Thomas G. Giolas Fellowship Fund

The Thomas G. Giolas Fellowship Fund was established as a permanent endowment fund held by the University of Connecticut Foundation in honor of father and husband, Thomas G. Giolas, Dean Emeritus of the Graduate School. This fund will provide scholarship support for an incoming or continuing graduate student enrolled full-time at the University of Connecticut's Graduate School. The award shall be given annually to a student who demonstrates high academic achievement in their field of study. The scholarship(s) may be renewed annually to the recipient(s) provided satisfactory academic progress is achieved.

Travel Funds for HDFS Graduate Students

In 2007 the Department Head and faculty of the HDFS department instituted a policy of providing limited funds for travel to conferences when a student is presenting a paper or poster. A form is available from the departmental office and on the HDFS Graduate HuskyCT site. Funds are limited, and thus maximum amounts per student are \$300 (pending availability of funding) and students are encouraged to apply as soon as they know a paper or poster has been accepted.

V. RESEARCH AND SERVICE CENTERS IN HDFFS

There are six direct service, research, and advanced training facilities included within the department of Human Development and Family Studies, each offering a unique opportunity to students and to a larger academic or public audience:

The Center for Applied Research in Human Development, a joint enterprise with the Cooperative Extension Service in the College of Agriculture and Natural Resources, specializes in meeting the needs of community, state, and federal agencies for high quality training, evaluation, and consultative services. These resources are increasingly in demand as human service programs are required to document the need for the services they offer and to evaluate their impact on the individuals and families being served.

The University of Connecticut Child Development Laboratories (CDL) is licensed by the state of Connecticut and accredited by the National Academy of Early Childhood Programs. The Laboratory serves the university, the HDFFS department, the Storrs community, and the New England region as a research facility for the study of child development, providing state-of-the-art training for students whose goal is a career in direct service to young children, as well as serving 66 local children and their parents as a model child care and education center. The CDL is a member of the Council of Child Development Laboratory Administrators.

The Frederick G. Humphrey Clinic for Individual, Couple, and Family Therapy is the primary on-campus training site for students in the Department's nationally accredited programs in Marriage and Family Therapy. The Clinic offers services to the local and university communities for a reasonable fee. Master's and Doctoral students provide clinical services and receive supervision from clinical faculty as part of their clinical training requirements.

The Center for the Study of Culture, Health, and Human Development is a University-wide resource for faculty from various disciplines focusing on the scientific understanding and active promotion of healthy human development in its cultural context, including HDFFS, Anthropology, Nursing, Nutritional Sciences, Pediatrics, and Education. The Center also manages the University-wide Graduate Certificate in Culture, Health, and Human Development.

The (Ronald and Nancy Rohner) Center for the Study of Interpersonal Acceptance and Rejection is an internationally-recognized center devoted to understanding healthy parental-child relations and the pathologies of child maltreatment. Faculty at the Center coordinate several national and international research projects, host visiting scholars from around the world, and consult with state and national agencies on the assessment and promotion of sound parent-child relations.

The Gerontology Program focuses on improving the lives of older persons through education and research, and manages the University-wide Graduate Certificate in Gerontology. Faculty are active in advising State and non-profit agencies on the programmatic needs of Connecticut's older citizens and conducting research on areas such as international aging policy, health in later life, racial and ethnic disparities, care giving to older persons, and housing. We are a participant in the Connecticut Geriatric Education Consortium (CTGEC), a statewide consortium of geriatric and gerontological training. For details on CTGEC, see their website at www.ctgec.org. We are also associated with the UConn Center on Aging at the UConn Health Center in Farmington.

VI. THE FACULTY AND PROFESSIONAL STAFF

Faculty

The following is a brief description of the Department of Human Development and Family Studies' faculty members and their research interests. More in-depth information regarding faculty can be found in at the HDFS website. See <http://www.familystudies.uconn.edu/contact/faculty.html>

Adamsons, Kari L.

Assistant Professor

Education: B.S., College of William and Mary; M.S., Ph.D., 2006, University of North Carolina at Greensboro

Disciplinary Background: Human Development and Family Studies

Areas of Interest: Parenting and fathering in diverse families; research methodology.

Anderson, Shayne R.

Assistant Professor

Education: B.S., M.S., Brigham Young University; Ph.D., 2007, University of Georgia, AAMFT Clinical Member and Approved Supervisor Candidate.

Disciplinary Background: Marriage and Family Therapy

Areas of Interest: Change processes in family therapy; therapeutic alliance and common factors in family therapy; treatment of high conflict couples

Anderson, Stephen A.

Professor, Director of the Center for Applied Research in Human Development, and Director of Marriage and Family Therapy Program

Education: B.S., Babson College; M.Ed., Northeastern University; Ph.D., 1982, Kansas State University, AAMFT Clinical Member and Approved Supervisor, Connecticut Licensed Marriage and Family Therapist.

Disciplinary Background: Marital and Family Therapy

Areas of Interest: Family interaction; assessment of family functioning; family violence; clinical supervision and training; program evaluation.

Asencio, Marysol W.

Associate Professor

Education: B.A., Hunter College; M.P.H., Dr.P.H., 1994, Columbia University

Disciplinary Background: Sociomedical Sciences

Areas of Interest: Latinos/Hispanics; gender; sexuality; migration; race/ethnicity; urban and community health; social inequities/human rights; qualitative research methods/ethnography.

Bellizzi, Keith M.

Assistant Professor

Education: B.A., Quinnipiac University; M.A., Central Connecticut State University; M.P.H., George Washington University; Ph.D., 2003, University of Connecticut

Disciplinary Background: Human Development and Family Studies and Epidemiology

Areas of Interest: Cancer survivorship and aging; health behaviors, resilience in the context of life threatening illness; family coping and illness; public health

Bladen, Anne

Lecturer, Executive Director Child Development Laboratories

Education: B.A. Bryn Mawr College; M.A., University of Connecticut, 1994

Disciplinary Background: Anthropology and Special Education

Areas of Interest: Early childhood teacher education and preparation; social-emotional development of young children; special education and early intervention; administration and staff development; families and parenting

Blank, Thomas O.

Professor

Education: B.A., Concordia Senior College; M.A. Phil., Ph.D., 1976, Columbia University

Disciplinary Background: Social Psychology

Areas of Interest: Psychosocial aspects of life threatening disease; social psychology of adult development and aging; retirement choices and effects; close personal relationships.

Britner, Preston A.

Associate Professor

Education: B.A., University of Miami; M.A., Ph.D., 1996, University of Virginia

Disciplinary Background: Developmental Psychology and Community Psychology

Areas of Interest: Child-parent attachment/caregiving interactions, especially in preschool years; child maltreatment and foster care correlates and issues; primary prevention; social policy and law affecting children and families; youth mentoring.

Brown, Edna

Assistant Professor

Education: B.A., Mount Holyoke College; M.S.W., Ph.D., 2002, University of Michigan

Disciplinary Background: Developmental Psychology

Areas of Interest: Aging and health, social relations across the lifespan; race and gender similarities and differences in marital relations and outcomes; religion and spirituality and well-being.

Csizmadia, Annamaria

Assistant Professor

Education: M. A., German Literature, University of Missouri-Columbia, 2001 ,Ph. D. Human Development & Family Studies, University of Missouri, 2008 Graduate Minors: Black Studies; International Development

Disciplinary Background: Human Development and Family Studies

Areas of Interest: Social-emotional development of multiracial children and youth, social-emotional and academic adjustment of racial and ethnic minority children and adolescents, multiracial and monoracial identity development, immigrant and low-income families, families of color and interracial families

Donorfio, Laura

Associate Professor

Education: B.A., Central Connecticut State University; M.S., University of Connecticut; Ph.D., 1996, University of Connecticut

Disciplinary Background: Human Development and Family Studies

Areas of Interest: Intergenerational relations; filial responsibilities and family dynamics via providing and receiving care.

Farrell, Anne

Associate Professor

Education: B.A., Fairfield University; M.A., Hofstra University; Ph.D., 1990, Hofstra University

Disciplinary Background: Psychology

Areas of Interest: Human development and disability; Best practices in developmental and psychological assessment.

Galante-DeAngelis, Mary

Lecturer

Education: B.S., University of Connecticut; ,M.A., University of Connecticut, School of Education; M.A., University of Connecticut , Human Development and Family Relations

Disciplinary Background: Early Childhood Education

Areas of Interest: Infant toddler development and early childhood development, infant toddler and early childhood curriculum, reflection, intentional teaching and classroom presence, history education, violence prevention.

Garey, Anita Ilta

Associate Professor

Education: B.A., M.A., California State University; Ph.D., 1993, University of California

Disciplinary Background: Sociology

Areas of Interest: Sociology of families; sociology of gender; social demography; symbolic interaction; methodology.

Harkness, Sara

Professor and Director of the Center for the Study of Culture, Health, and Human Development

Education: B.A., Brown University; Ph.D., 1975; M.P.H., 1984, Harvard University

Disciplinary Background: Anthropology, and Maternal and Child Health and Population Sciences

Areas of Interest: Cultural structuring of human development; parents cultural belief systems and parenting; cognitive, affective and social development in early childhood, child language socialization; theories of culture and human development; cultural influences on health at the household and community levels; family policy.

LaPlante, Doris

Clinical Instructor and Director of the Humphrey Clinic for Individual, Couple, and Family Therapy

Education: Adelphi University, MS in Social Welfare, 1969, UConn School of Social Work, MSW Concentration in Casework and Group work, Mental Health Substantive area, 1980; Post Degree training at Bristol Hospital Family Therapy Training Institute, Marriage and Family Therapy Training and AAMFT Approved supervisor training 1982 to 1986. AAMFT Clinical Member and Approved Supervisor, Connecticut Licensed Marriage and Family Therapist.

Disciplinary Background: Social Work and Marriage and Family Therapy

Areas of Interest: Training and supervision, psychotherapy, mental health

Larrabee, Kim

Lecturer

Education: B.A. Unity College; M.A., C.W. Post College, 1988

Disciplinary Background: Special Education/Elementary Education

Areas of Interest: Early childhood development, special education, disabilities rights -school and community settings, family advocacy.

McBreen, Edna

Professor

Education: B.S., Cornell University; M.Ed., Texas A&M University; Ph.D., 1982, Cornell University

Disciplinary Background: Human Services Studies

Areas of Interest: Family resource management and family decision-making; the impact of public policy on families in the U.S. and internationally; the role of higher education in enhancing the quality of life in the U.S. and the developing world.

Rigazio-DiGilio, Sandra A.

Professor

Education: B.S., University of Massachusetts; M.A., University of Connecticut; Ph.D., 1989, University of Massachusetts, AAMFT Clinical Member and Approved Supervisor, Connecticut Licensed Marriage and Family Therapist.

Disciplinary Background: Counseling Psychology

Areas of Interest: Cognitive-developmental theory and therapy; gender and ethnicity in family therapy; effectiveness of MFT training and supervision

Robinson, JoAnn L.

Professor, Associate Department Head for Graduate Studies

Education: B.A., Connecticut College; PhD, Cornell University 1982

Disciplinary Background: Human Development and Family Studies

Areas of Interest: Prevention and early intervention for families and young children; impact of interventions on emotional development and parent-child relationships; infant mental health; assessment of emotional development ages 0-8 years.

Sabatelli, Ronald M.

Professor, Department Head

Education: B.A., M.A., Ph.D., 1980, University of Connecticut

Disciplinary Background: Human Development and Family Studies

Areas of Interest: Family interaction processes; processes mediating the formation, maintenance, and breakdown of intimate dyads.

Sheehan, Nancy W.

Associate Professor

Education: B.S., University of Massachusetts; M.S., Ph.D., 1976, University of Wisconsin-Madison

Disciplinary Background: Human Development

Areas of Interest: Life-span developmental psychology; socio-psychological aspects of aging; particular interest in women and aging; housing for the elderly.

Super, Charles M.

Professor

Education: B.A., Yale University; Ph.D., 1972, Harvard University

Disciplinary Background: Developmental Psychology

Areas of Interest: Cultural regulation of human development, particularly biological, cognitive, and emotional development during infancy and childhood; parental and professional ethnotheories of child development and behavior; interventions to promote the physical and mental health of children and families; research methods appropriate for comparative and culturally based research.

Tambling, Rachel

Assistant Professor

Education: B.S., Central Michigan University; M.A., Western Michigan University; Ph.D., 2008, University of Georgia, AAMFT Clinical Member and Approved Supervisor Candidate.

Disciplinary Background: Marriage and Family Therapy

Areas of Interest: Factors contributing to successful outcomes in couple therapy; client and therapist expectations about therapy; research methods and statistical techniques to address non-independence in dyadic and small group research; strategies for engaging and retaining clients in couple therapy.

Weaver, Shannon

Associate Professor, Associate Department Head for Undergraduate Studies

Education: B.S., M.S., Ph.D., 2000, University of Missouri

Disciplinary Background: Human Development and Family Studies

Areas of Interest: Family interaction; family theory; remarriage and stepfamilies; gender.

Wisensale, Steven K.

Professor

Education: B.A., Salem College; M.Ed., Temple University; M.A., Wesleyan University; Diploma, University of Stockholm; Ph.D., 1983, Brandeis University

Disciplinary Background: Public Policy and Gerontology

Areas of Interest: Family caregiving; human services; management and planning.

Emeritus Faculty

Arms, Karen

Emeritus Associate Professor

Education: B.S., Northwest Missouri State University; M.S., University of Akron; Ph.D., 1974, Kent State University

Disciplinary Background: Education, Cognate areas of Family Studies and Early Childhood Education

Areas of Interest: Human development; education; community service; early childhood education; the process of change; leadership and administration.

Brown, Irene Q.

Emeritus Associate Professor

Education: B.A., University of Washington; M.A., Harvard-Radcliffe; Ph.D., 1969, Harvard University

Disciplinary Background: History

Areas of Interest: Family history; women's history; domesticity and feminism; marriage choice; widowhood; especially the history of friendship in England and America, 1650-1850.

Corsini, David A.

Emeritus Associate Professor

Education: A.B., Bowdoin College; M.A., Ph.D., 1967, University of Minnesota

Disciplinary Background: Child Development; Minor: Psychology

Areas of Interest: Cognitive development; memory development; moral development; developmental changes during the 5-7 age period; early childhood programs.

Goldman, Jane A.

Emeritus Associate Professor

Education: B.S., Ph.D., 1976, University of Wisconsin-Madison

Disciplinary Background: Human Development

Areas of Interest: Social and personality development; observational research; substantive and methodological issues; early childhood education; environment and behavior; impact of food sensitivities on behavior.

Mulroy, Maureen

Emeritus Associate Professor

Education: B.S., North Dakota State University; Ph.D., 1981, University of Maryland

Disciplinary Background: Lifespan Human Development

Areas of Interest: Designing community education programs for children, youth and families; parent education; preventative education programs for children and youth at-risk; program evaluation methodology.

Rohner, Ronald

Emeritus Professor and Director of the Ronald and Nancy Rohner Center for the Study of Parental Acceptance and Rejection

Education: B.S., University of Oregon; M.A., Ph.D., 1964, Stanford University

Disciplinary Background: Psychological Anthropology

Areas of Interest: Human development in cross-cultural perspective; research methods in natural settings; cross-cultural psychology; world-wide study of parental acceptance-rejection, including child abuse.

Ryder, Robert G.

Emeritus Professor

Education: B.A., Rutgers University; M.A., Ph.D., 1961, University of Michigan

Disciplinary Background: Psychology

Areas of Interest: Early marriage and dyadic intimacy. AAMFT Clinical Member, Fellow and Approved Supervisor; AASECT Certified Sex Therapist and Sex Educator.

APPENDIX B

Department of Human Development and Family Studies Criteria for Evaluating Dissertation Proposals		
Introduction	Y/N	Comments
Is the <i>statement of the problem</i> effectively introduced?		
Is the <i>significance of the research</i> well defined?		
Is the <i>general purpose of the study</i> clearly stated?		
Are <i>topics to be addressed</i> clearly presented?		
Review of Related Literature	Y/N	Comments
Does the review effectively organize the relevant professional scholarship to provide <i>theoretical, empirical, and clinical rationale for the study</i> ?		
Is there a <i>critical analysis</i> of the professional exchange and research?		
Does the author distinguish <i>research findings from conclusions</i> ?		
Questions, Methods, and Analysis	Y/N	Comments
QUESTIONS		
Is the <i>research paradigm and approach</i> clearly described and justified?		
Do <i>research questions/hypotheses/predictions</i> match purpose of the study?		
Is the <i>methodology</i> adequate to examine the questions/ hypotheses/ predictions?		
METHODS		
Is the <i>sample and sampling strategy</i> appropriate and feasible?		
Are <i>qualitative and/or quantitative methods</i> clearly described and justified.		
If <i>qualitative and quantitative methods</i> are used, is the link between them defined?		
Are the <i>psychometric properties</i> of the measures adequately described?		
Are other <i>instruments and materials</i> adequately accounted for?		
DATA ANALYSIS PROCEDURES		
Is the <i>plan for data analysis</i> logical and well developed?		
Are the measurement characteristics and proposed analysis <i>congruent</i> ?		
Does the plan address the proposed <i>research question/ hypotheses / predictions</i> ?		
Are the <i>limitations</i> of the proposed methods and procedures addressed?		
Delimitations and Limitations	Y/N	Comments
Is a <i>plan for discussion</i> of the results clearly stated?		
Are known <i>limitations</i> clearly discussed and plans for further discussion identified?		
POSSIBLE IMPLICATIONS		
Are the possible implications of the research clearly discussed?		
Ethical Issues for use of Human Subjects	Y/N	Comments
Are ethical issues regarding the use of human subjects clearly addressed?		
References	Y/N	Comments
Are all references cited listed both in the body and the bibliography?		
Style	Y/N	Comments
Is APA or an alternative professional format used consistently?		
Is the proposal well written?		

APPENDIX C

Dissertation Resources

Recommended Books:

American Psychological Association (2009). *Publication manual of the American Psychological Association (6th ed.)*. Washington, DC: Author.

Cone, J. D., & Foster, S. L. (2006). *Dissertations and theses from start to finish: Psychology and related fields (2nd ed.)*. Washington, DC: American Psychological Association.

Locke, L.F., Spirduso, W.W. & Silverman, S.J. (2000). *Proposals That Work: A Guide for Planning Dissertations and Grant Proposals, 4th ed.* Corwin Press. - Information that applies to all research proposals as well as issues specific to the use of proposals in graduate education and funding agencies.

Sternburg, D. (1981). *How to Complete and Survive a Doctoral Dissertation*. St. Martin's Press. - Although this book was written in 1981, it has excellent reviews and is recommended on several websites concerning dissertation writing.

Brause, R.S. (1999). *Writing Your Doctoral Dissertation: Invisible Rules for Success*. Routledge Farmer. - A practical guide for students with help on planning, writing and defending a dissertation. Provides samples of accepted proposals and dissertations

Rudestam, K.E. & Newton, R.R. (2001) *Surviving Your Dissertation: A Comprehensive Guide to Content and Process, 2nd ed.* Sage Publications. - Advice on the entire dissertation process, from selecting a suitable topic, through the literature review, building and presenting an argument, dealing with committee members and emotional blocks.

Recommended Web Sites:

Dissertation Project Funding:

Fulbright Grant (for graduate students)

Graduate students can apply for a Fulbright Grant (ie.org/Fulbright) offered through the U.S. Department of State. The program annually awards about 1,500 students with [funding](#) to study or conduct research overseas in multiple fields, such as sociology, performing arts and science. Student who have earned a doctorate degree are ineligible--excluding juris doctorate (law degree).

National Institutes of Health/National Research Service Awards (the graph below illustrates which grants are applicable at different stages of one's career)

[Ruth L. Kirschstein National Research Service Awards \(NRSA\) Training Grants and Fellowships](#)

NCFR - The following graduate student awards are given:

NCFR Honor Student Recognition (Presented ongoing) - This award acknowledges the outstanding accomplishments and academic success of family science students. By recognizing exceptional scholarship, leadership and service in graduating undergraduate and graduate students, NCFR wishes to honor worthy recipients for their excellence and encourage and empower them to continue to excel in and make contributions to the field of family science. [NCFR Honor Student Recognition Application Form](#).

NCFR Student Award (Presented yearly) - This award is given to a NCFR graduate student member who has demonstrated excellence as a student with high potential for contribution to the field of family studies.

Ruth Hathaway Jewson Award (Presented in even years) - This award is given to fund the best Family Studies dissertation proposal submitted by a doctoral candidate.

John L. McAdoo Dissertation Award (Presented in even years) - This award is a tribute honoring the scholarship and leadership of John Lewis McAdoo, Professor of Family and Child Ecology at Michigan State University and a founding member of the NCFR Ethnic Minorities Section.

Jessie Bernard Award - Outstanding Research Proposal from a Feminist Perspective (Presented yearly) - This award, sponsored by the Feminism and Family Studies Section, recognizes a graduate student/new professional who has demonstrated excellence in research and potential contribution to feminist scholarship.

Jessie Bernard Award - Outstanding Contribution to Feminist Scholarship Paper (Presented yearly) - This award, sponsored by the Feminism and Family Studies Section, recognizes a graduate student/new professional who has published or is about to publish a paper using feminist frameworks and methodologies in research.

Affiliate Councils Outstanding Student Research Paper (Graduate & Undergraduate) (Presented yearly) The graduate student paper winner will receive \$500 and be expected to present the paper at the NCFR conference and must be a NCFR member. The undergraduate student paper winner will receive \$100. Applications are nominated by active affiliates.

Cindy Winter Scholarship Award (Presented in odd years) - This award is to honor a student or new professional who has demonstrated outstanding leadership or service in family studies, human ecology, human development, family science, or a related field.

National Science Foundation

The National Science Foundation's Division of Behavioral and Cognitive Sciences (BCS), Division of Social and Economic Sciences (SES), and Division of Science Resources Statistics (SRS) ***award grants to doctoral students to improve the quality of dissertation research***. These grants provide funds for items not normally available through the student's university. Additionally, these grants allow doctoral students to undertake significant data-gathering projects and to conduct field research in settings away from their campus that would not otherwise be possible. Proposals are judged on the basis of their scientific merit, including the theoretical importance of the research question and the appropriateness of the proposed data and methodology to be used in addressing the question.

Foundations Supporting Aging Research

[Atlantic Philanthropies](#) aims to ensure that older adults are treated with dignity and respect; are fully empowered to shape their own destinies; have access to health and support systems; are represented by a strong cadre of leaders; and are able to contribute actively their expertise and abilities for the good of society.

The Commonwealth Fund is one of the largest private foundations in the United States.

Council of Foundations is the umbrella national organization for philanthropic foundations in the United States.

Dana Foundation is a private philanthropic foundation focused on health and education. It supports among other projects the Dana Alliance for Brain Initiatives whose members include over 100 neurobiologist researchers.

John A. Hartford Foundation is a private philanthropy established by John A. Hartford. The majority of the Foundation's current grantmaking relates to enhancing geriatric research and training, and integrating health-related services to older adults.

Robert Wood Johnson Foundation is a very large private foundation.

The Pew Charitable Trusts is a very large Philadelphia private foundation that makes more than 400 grants a year.

The Retirement Research Foundation is the nation's largest private foundation whose grantmaking is focused on older adults and aging issues.

Websites for Dissertation Proposals:

- Dissertation Proposal Workshop <http://globetrotter.berkeley.edu/DissPropWorkshop//>
Sponsored by the Berkeley-Rockefeller African Development Dissertation Workshop Program – This site comprises a collection of tips, samples, and links about writing research proposals.
- A Writer's Guide to Research and Development Proposals
<http://mutans.astate.edu/dcline/Guide/Problem.html>
Written by Daniel Kline, professor at Arkansas State University, Educational Leadership Center for Excellence in Education, this site hosts a paper on writing proposals and includes a thorough outline of what a proposal should include.

Websites for the entire dissertation process (including proposals)

- Writing and Presenting Your Thesis or Dissertation
<http://www.learnerassociates.net/dissthes/>
Written by S. Joseph Levine, Ph.D., professor at Michigan State University
A site dedicated to the practical aspects of the thesis/dissertation process, including sections on the Thinking about It Stage, Preparing the Proposal, Writing and Defending the Dissertation.
